Subject: Approval of Amended Notice of Intention and Need for Re-evaluation of Reclamation Surety, Martin Marietta Materials, Inc., Milford Quarry 1 Mine, M/01/0036, Beaver County, Utah

Dear Mr. Sharn:

The Division of Oil, Gas and Mining approves the amendment to update contact information for the Milford Quarry 1 mine Notice of Intention to Commence Large Mining Operations (Notice). This amendment was received March 30, 2016. Thank you for your attention to this matter. Please find enclosed a copy of the pages which have been stamped approved for your records.

The reclamation surety for this mine is now due for review and adjustment. The Division may adjust the amount of reclamation surety as the result of a periodic review taking into account inflation/deflation based on an acceptable cost index (R647-4-113.6). The last reclamation cost estimate for the Milford Quarry 1 mine was completed in 2011 and escalated to 2016, with a bond escalation date of August 24, 2016.

To properly calculate the reclamation cost estimate, the Notice may need to be amended to reflect current and future operating conditions. **Please submit any necessary amendment to the Notice and an updated reclamation cost estimate using the Division's forms by August 24, 2016.** Please refer to your 2011 reclamation cost estimate, which was calculated using spreadsheets developed by the Division. These worksheets are also available in the Minerals Program's area of the Division's web site (ogm.utah.gov) under the Bonding section.

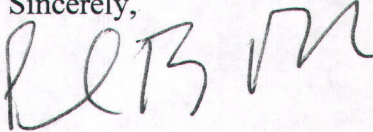

Once any Notice amendment and the reclamation cost estimates have been reviewed, the Division may need to ask you to adjust the amount of reclamation surety held to reflect the current conditions and estimates.
